

FOURTEENTH
ANNUAL REPORT
OF THE
BOARD OF DIRECTORS
OF
CITY TRUSTS.

Report for the Year 1883.

PHILADELPHIA:
JANUARY, 1884.

PHILADELPHIA:
BURK & McFETRIDGE, PRINTERS,

Nos. 306 and 308 Chestnut St.,

1884.

BOARD OF DIRECTORS
OF
CITY TRUSTS
1884.

ALEXANDER BIDDLE, *President.*

1307 Walnut Street.

Ex-Officio Member of all Standing Committees.

WILLIAM H. DRAYTON, *Vice-President.*

704 Walnut Street.

JAMES CAMPBELL,
215 South Sixth Street.

JOSEPH L. CAVEN,
712 Walnut Street.

JAMES L. CLAGHORN,
314 Chestnut Street (Com'l Bank.)

CHARLES H. T. COLLIS,
138 South Third Street.

BENJAMIN B. COMEGYS,
421 Chestnut Street (Philad'a Bank)

WILLIAM B. MANN,
514 Walnut Street.

JOHN H. MICHENER,
122 Arch Street.

HENRY M. PHILLIPS,
126 South Sixth Street.

GEORGE H. STUART,
Merchants' Bank, 108 S. Fourth St.

LOUIS WAGNER,
218 Walnut Street.

Members of the Board, "Ex-Officio."

SAMUEL G. KING, *Mayor*, Office, Fifth and Chestnut Streets.

WILLIAM B. SMITH, *Pres't Select Council*, 256 South Third Street.

WILLIAM H. LEX, *Pres't Common Council*, 51 North Sixth Street.

CHARLES T. MILLER, *Secretary,*

No. 10 South Twelfth Street.

COMMITTEES, 1884.

Committee on Finance.

JAMES L. CLAGHORN, *Chairman*,
JOSEPH L. CAVEN,
WILLIAM H. DRAYTON,

JAMES CAMPBELL,
C. H. T. COLLIS,
PRES'T SELECT COUNCIL.

Committee on Girard Estate within the City.

JOHN H. MICHENER, *Chairman*,
JAMES CAMPBELL,
JOSEPH L. CAVEN,

BENJAMIN B. COMEGYS,
JAMES L. CLAGHORN,
THE MAYOR OF THE CITY.

Committee on Girard Estate without the City.

LOUIS WAGNER, *Chairman*,
JAMES CAMPBELL,
C. H. T. COLLIS,

WILLIAM H. DRAYTON,
WILLIAM B. MANN,
THE MAYOR OF THE CITY.

Committee on Household of Girard College.

GEORGE H. STUART, *Chairman*,
JOHN H. MICHENER,
WILLIAM B. MANN,

LOUIS WAGNER,
JOSEPH L. CAVEN,
WM. H. DRAYTON.

Committee on Instruction and Library of Girard College.

JAMES CAMPBELL, *Chairman*,
WILLIAM H. DRAYTON,
WILLIAM B. MANN,

BENJAMIN B. COMEGYS,
JAMES L. CLAGHORN,
PRES'T SELECT COUNCIL.

Committee on Admission, Discipline and Discharge.

C. H. T. COLLIS, *Chairman*,
JAMES L. CLAGHORN,
GEORGE H. STUART,

HENRY M. PHILLIPS,
B. B. COMEGYS,
PRES'T COMMON COUNCIL.

Committee on Mechanical Instruction.

WILLIAM H. DRAYTON, *Chairman*,
HENRY M. PHILLIPS,
JOHN H. MICHENER,

LOUIS WAGNER,
JAMES CAMPBELL,
PRES'T SELECT COUNCIL.

Committee on Infirmary.

BENJAMIN B. COMEGYS, *Chairman*,
WILLIAM B. MANN,
C. H. T. COLLIS,

JOHN H. MICHENER,
LOUIS WAGNER,
PRES'T COMMON COUNCIL.

Committee on the Property and Administration of Wills' Hospital.

WILLIAM B. MANN, *Chairman*,
JAMES L. CLAGHORN,
JOSEPH L. CAVEN,

GEORGE H. STUART,
BENJAMIN B. COMEGYS,
PRES'T COMMON COUNCIL.

Committee on Shields' Almshouse Fund.

JOSEPH L. CAVEN, *Chairman*,
HENRY M. PHILLIPS,
LOUIS WAGNER,

GEORGE H. STUART,
C. H. T. COLLIS,
PRES'T COMMON COUNCIL.

Committee on Appropriations.

HENRY M. PHILLIPS, *Chairman*,
JOSEPH L. CAVEN,
JOHN H. MICHENER,

GEORGE H. STUART,
WILLIAM H. DRAYTON,
LOUIS WAGNER.

THE
FOURTEENTH ANNUAL REPORT
OF THE
DIRECTORS OF CITY TRUSTS.

To the Legislature of the State of Pennsylvania, the Councils of the City of Philadelphia, and the Board of Appointment, comprising the Judges of the Courts of Common Pleas for the City and County of Philadelphia:—

THE BOARD OF DIRECTORS OF CITY TRUSTS appointed in the name of the City of Philadelphia, to do, perform and discharge whatever acts and duties are, or from time to time may become proper or necessary to be done by the said City in discharge of said Trusts, respectfully presents its Fourteenth Annual Report, for the year ending December 31, 1883.

The Girard College work for the past year has had for its object the preservation of an educational system, which experience had proved to work well, while incorporating therewith a greater number of pupils, now double the number originally taken charge of, and so to classify them that without injury being done, we might continue new enterprises for

the general good, and more certainly secure to our pupils the means of making an honorable livelihood in the outset of their worldly career.

To this end, the Board which in 1870 was divided into seven standing Committees is now divided into eleven; each one of which is charged with an amount of labor fully equal to that of an ordinary Board of Directors.

Two of these Committees have charge of the Girard Estate; one, of that portion within the City and County of Philadelphia, and one of the coal and other property outside thereof; one other, of the management of the Wills Hospital and thirty-one minor trusts, including benefactions for fuel and soup, loans to artificers, medals and premiums for inventions, Grover Estate, &c.

One other to the Shields' Fund.

One to the control and scrutiny of the finances, investments, and all bills contracted for materials, work, &c., &c.

One to appropriations, whose province is annually and from time to time to consider the wisdom of all that may be asked for.

The remaining Committees have the care of the internal administration and domestic relations of the household of the Girard College, the instruction of the orphans, the supervision of teachers, prefects and governesses, &c., mechanical instruction or handicraft, discipline, admission and discharge, with the indenturing of the orphans to trades and occupations, and the infirmary.

The first of these Committees has the care of all the dwelling houses, stores, piers and 527 acres of farm land, in the City and County, whose repairs are watched by a superintendent, whose duty is to inspect all work, see that it is well performed, and certify it from his personal knowledge before it can be acted on by the Committee.

In the repairs for the year are included the renovation of the Girard Bank from the cellar to the third floor, with tiled

flooring, enlarged windows, a new staircase of walnut wood, and also frescoed walls and ceilings, on the cost of which ornamental work an interest of six per cent. per annum is paid by the lessees in addition to the annual rent.

Five stores in Church street have been almost reconstructed, an entire restoration of sound foundation walls, with new improved drainage having been recommended by our engineer and perfected to insure their permanent value as tenantable places of business.

The alteration of 1138 Girard street, or 19 South Twelfth street, is finished, and now affords in three large permanent wall fire and thief-proof safes, with a portable one of Farrel & Herring's, a protection to the valuable trust documents and papers which they have never had before ; most of them have been removed to these safes, and a schedule carefully prepared by our former solicitor, Mr. George R. Kærcher, makes them promptly obtainable when wanted for use in Pottsville.

The building No. 19 South Fifth street, formerly occupied by the Girard Estate, has been altered and let to a tenant at a reasonable rate. Much other expensive work has been done in paving, curbing and flagging on Poplar and other streets, to improve the Estate and promote the public convenience as a duty under the Will of Mr. Girard, to increase the welfare of the City of his love.

The question of lighting Delaware avenue, Eleventh, Twelfth, Market and Girard streets, with electricity, has long been considered ; proposals have been invited for laying wires underground, which the Board considers the best method of its introduction along the city front with due regard for public safety.

It is an undecided point of law whether the acquisition and widening of Delaware avenue along the city front, with moneys paid from the Girard Estate, renders it subject to the Highway Department's rules and control as one of the streets of the city, or whether it remains a private way, over which

those rules have no operation, but, in whichever way such right may finally be decided to rest, the bequest of Stephen Girard will ever be available for the thorough protection of the cleanliness, health and comfort of this section, and to insure facility of traffic along the city front.

A contract for cleaning the streets and alley-ways for three years has been awarded at a cost of \$2643 per annum.

It is probable that the whole city front may soon require repaving, and the advantage and feasibility of constructing stone bulkheads for all the docks between the piers or wharves is now under consideration.

The river front is under the charge of Mr. Chas. W. Carns, a special officer of long experience and high character, clothed with police authority by the Mayor of the city, and paid by the Girard Estate.

The annual income of the Delaware avenue fund is now \$42,220.

Payments of reasonable sums have been made to effect the removal of ten wooden buildings in Juniper, Lombard, South, Race, and Sixth streets, amounting during the year to \$1125.

The coal estate in Schuylkill and Columbia Counties and some tracts of arable and forest land out of the coal measures form the chief care of the Committee on lands out of the city.

Nine of the present coal leases, including the workings of eleven collieries, expire on the 31st Dec., 1883, and the remaining two on Dec. 31st, 1884. The subject of the renewal of these leases has engaged the attention of the Committee for the last two years, and after much careful deliberation with the Solicitor, Engineer, Superintendent and Mine Inspector, new leases have been prepared and delivered to the lessees, to run for fifteen years, from the 31st Dec., 1883.

These leases begin with a royalty of forty cents per ton, for all kinds of coal except pea coal, increasing one cent per ton per annum, bringing the royalty up finally to fifty-four cents

for the last year of the leasehold. Pea coal which was six cents per ton in the old leases, will hereafter be fifteen cents per ton, without change. No allowances are to be made for driving tunnels; these with provisions for forfeiture in case of fire appearing in the mine workings, with simplified legal relations, are new results obtained by the new forms.

In view of the new letting of the collieries, a petition was presented to the Court of Common Pleas, No. 3, sitting in equity, asking for authority to make and execute leases for mining rights for terms not exceeding fifteen years after the expiration of the present leases; and under date of June 4th, 1883, by decree of the Court, the City of Philadelphia Trustee under the will of Stephen Girard, was authorized and directed so to do, which was duly certified to the Board from the record on the 9th June, 1883. The new leases are ten in number, as follows, viz. :—

No. 1. City of Philadelphia Trustee, to the Philadelphia & Reading Coal & Iron Co., for Hammond & Conner Colliery.

No. 2. Same to same, for Girard Colliery.

No. 3. Same to same, for North Ashland Colliery.

No. 4. Same to Lehigh Valley Coal Company, for Colorado Colliery, (Packer No. 1.)

No. 5. Same to same, for Continental Colliery.

No. 6. Same to Myers, McCreary & Co., East Bear Ridge Colliery.

No. 7. Same to Myers, McCreary & Co., West Bear Ridge Colliery.

Consent has recently been given to transfer Nos. 6 and 7 to the Philadelphia & Reading Coal & Iron Co.

No. 8. Same to William Penn Coal Co.

No. 9. Same to Thomas Coal Co., known as Kehley's Run Colliery.

No. 10. Same to John A. Dutter, a new working on the John Blackey and Thomas Paschall tracts, known as the South Laurel Ridge Colliery.

It is also proposed to make new openings and construct a new breaker on a branch of the Ashland Extension of the Lehigh Valley Railroad upon ground let under Lease No. 4, from which a large tonnage may be expected.

All the coal breakers upon the Estate, where the City has made advances, are insured by the lessees, and the policies assigned to the Girard Estate as security for the value of the timber used in their construction, (mainly furnished from the property) that the renewal of the breakers may be rendered certain in case of damage by fire.

The course of Mahanoy Creek has been straightened at the eastern end of the Girard Colliery lease, at a cost of \$4667.97 of which the Estate pays one-half \$2333.98.

Lots for surface rights have been sold under authority of the Courts in pursuance with the policy of establishing a permanent resident population of householders of good character, whose industrial pursuits contribute to the sources of revenue of the Estate. Valuable improvements have been made to the Girardville Hotel for the better accommodation of the public.

A disastrous fire occurred at Shenandoah City, bringing much suffering to the poorer inhabitants; for their relief the sum of \$1000 was promptly paid by order of the Board and the local Superintendent authorized to extend all material aid in his power to the burnt-out families.

The net income of the Girard Estate from this property during 1883 is \$467,757.94, exceeding the income of 1882 by \$49,204.70.

The present year is the most productive of income in the history of the management of the Trust.

The investments of funds derived as above, have been as follows :—

City 4's,	\$10,000	Cost	\$10,450.00
City 6's,	192,450	"	249,777.63
Mortgage, 1506 Fawn St.,	350	"	350.00
Girard Water Co.,	6,500	"	6,500.00
	<hr/>		<hr/>
	\$209,300		\$267,077.63

Large sums of money have been expended in building solid mason-work dams, to secure and store the water of Lost Creek, whose reservoirs now have a storage capacity of 35,000,000 gallons, without which provision of the foresight of the Committee the collieries upon the Estate would have been forced into idleness during the dry weather of Summer. It is now thought wise to construct a new dam with an additional capacity of 85,000,000 gallons, the estimated cost of which, including distributing mains, is under \$60,000. The plans and estimates have been completed and the work begun, but to more perfectly guard the present works, retain the control of the water supply upon the property and the adjacent water sources, a charter under the name of the Girard Water Company has been applied for and a patent issued under the seal of the Commonwealth, at the instance of the representatives of the Estate; this action was thought proper to forestall any possible hostile action which might arise from parties not connected with the Estate, some indications of which had become apparent.

The supply of water to the collieries has been paid for at a moderate rate, giving an interest to the Estate of about seven per cent on the outlay; but the benefit to the collieries and the inhabitants is immeasurable, and is regarded by the Board purely as a benefaction to the community, from which they seek to derive no greater revenue than will justify their action as Trustees in a great outlay of the funds of the Estate in a project not free from uncertainty, but which has thus far tended greatly to promote the health, happiness and prosperity of the county.

From the revenues which maintain the Girard College, we come to their application.

Mr. Adam H. Fetterolf, Ph. D., President elect of the Girard College, and Mr. Henry D. Gregory, Ph. D., elected Vice-president, January 24, 1883, were inaugurated on the 7th of March, 1883, in the chapel of the College, with suitable ceremonies conducted by members of the Board of City Trusts, in the presence of the officers, teachers and pupils of the institution and a large number of their friends. The new officers responding to the addresses and accepting the duties assigned them.

The subsequent reports of the President assure us that the plan of instruction continues to work effectually, notwithstanding the increase and interference referred to in the opening of our report, but yet greater increase as soon as assured revenues may warrant it, may be considered the settled purpose of the present direction.

Mr. Girard at first set aside five acres or less for college purposes, naming three hundred as the minimum number of orphans he expected that space to accommodate. He then, by a codicil, allotted forty-five acres for those purposes now reduced by encroachments conceded for the benefit of the city to forty acres. So that when income is sufficient, and the management works in perfect harmony in all its parts, the extent of enlargement which it is the duty of Trustees to aim at, appears to resolve itself into a simple question of arithmetic.

The exactness of the Will is likewise perceived in the provision that the orphans "shall be instructed in reading, writing, grammar, arithmetic, geography, navigation, surveying, practical mathematics, astronomy, natural, chemical and experimental philosophy, the French and Spanish languages," "with such other learning as their capacities may merit," and also in the expressed desire that "they shall be taught facts and things rather than words and signs," while pupils

must leave the college between fourteen and eighteen years of age. To comply rigidly with these requirements and give the boys a basis of sound strength, morally and mentally, whilst seeking by close observation to lead them to those fields of useful work to which their capacities are best adapted, has been our aim.

The gratifying experiment in mechanical teaching last year, has induced the Board, when compelled by the worn-out condition of the steam boilers after the use of many years, to provide new boilers and a boiler house with increased steam power for the purposes of cooking, heating, washing and ventilation, etc., and to connect therewith as a matter of advantage and economy, a building for the purposes of mechanical instruction in metals and woods.

The need of the building is well set forth in the following condensed extracts from a report to the Board :—

“ Heretofore, the boys have only been instructed in metal working. This, an experiment undertaken with great caution and on a small scale, in deference to the misgivings of some members of the Board, and with the experience of one or two failures in the same direction has, we are happy to report, from its inception, in April, 1882, to this time, continued to give such entire satisfaction, has proved so useful and attractive to the pupils, and has helped us so materially in securing occupation for no less than thirty of our boys in first-class mechanical establishments, where, instead of having to learn the most rudimentary branches, they are at once recognized as useful workmen and paid accordingly, that we feel encouraged to recommend to the Board that the instruction now confined to metal work, such as filing to line, sawing and filing, known as template work, fitting, dovetailing, chamfering, chipping and sawing, free hand filing with hand vise, etc., be extended to wood work in its various branches.”

We have before referred to the importance of extending mechanical instruction to be given to boys, to wood work. Heretofore, the work has been confined to iron and steel alone, and in seeking employment our lads are restricted to this kind of work. We think it advisable and strenuously recommend to the Board to extend the teaching to the using of tools in wood. We see no reason why this character of instruction should not be equally successfully taught and the demand for wood workers is almost as great as for workers in metals. While free hand drawing is admirably taught in the College, there is little time or opportunity for mechanical drawing which is so important to the skilled mechanic. We advise that this be made part of mechanical instruction, etc.

No attempt has been made to teach the pupils any distinct trade, except perhaps a few boys of remarkable natural ability for mechanics; in view of the early age at which they are compelled to leave the College this would be impossible.

They are taught the use of tools, and how to handle them in the workshop, as they are taught to read, write and cipher in the school rooms; the one course enabling them to become clerks, bookkeepers, conveyancers, the other, machinists, furniture-makers, blacksmiths, cabinet-makers, locksmiths, and to obtain employment in kindred trades.

The Instructor also reports, "that he has in view the adoption of plans whereby illuminated objects of machinery, embracing a much wider scope of explanation, may be introduced with much advantage, which will familiarize the boys with what they will meet with in mechanical business. A pause is frequently made, when the attention of classes is called to the elucidation of points bearing upon particular stages of their work, and whilst general attention is given there have come back to us expressions of thanks from those who are testing the knowledge thus obtained in their daily work of life." }

The Sunday offices of devotion are conducted by laymen invited from time to time by the President of the College to

take charge of them ; and we here desire to acknowledge the great obligation our wards owe to the earnest efforts of the kindly gentlemen who have so often labored unselfishly and earnestly for their spiritual good.

A new manual of worship, prepared by a member of the Board with its approbation, is a valuable addition to the purity and solemnity of our services.

The household supervision continues under the able care of Miss Anna M. Shreve, Matron, and Mrs. Elizabeth B. Thompson, Assistant Matron, to whose constant attention as well as to that of teachers, prefects and governesses the orphans are indebted for all their health, comfort and improvement.

The number of orphans in the College on the 31st December, 1883, was 1105.

The number of boys admitted since 1848 up to 31st December, 1883, is 3057.

The expenses of an unusual character are the following :—

The wall of the College at the junction of College avenue, Poplar and Twenty-fifth streets, has been rounded for public convenience, removing a sharp angle, at the cost of the Girard Estate.

The basement of No. 2 building has been laid in artificial stone and cement, with new water supply pipes for bathing pools and drainage.

The repairs to the building formerly occupied by President Allen, which had but little expended on it during the last twenty years, are now finished.

Early in the year a visit of inspection to the ducts and underground passages leading from West to East, some ten feet beneath the surface, disclosed the fact that the cellars of the College building needed purification—the cellar floors being of the earth exposed in their excavation, as many as six wells had been dug for drainage purposes, to succeed one another as they became filled. A duct had been cut in

past days through an inverted arch, above which the foundation wall bearing upon it was found to be cracked and some settling was visible in the architrave resting upon the jambs of the south doorway of the College and also near the heads of the pilasters in the south vestibule. The inverted arch has been repaired with solid mason-work, the wells filled up, a drain pipe led through the proper aperture south of the building into a sewer, and the floor of the cellar and passages under the porticos covered with a coating of cement, leaving them pure air chambers, free from any likelihood of deleterious matter accumulating; this being finished, careful comparison with the early reports of the building of the College was made and the Architect reports thereon, that nothing has been done to impair the original plan of ventilation, but the new work will greatly conduce to the preservation of the property and health within its walls.

The work in the cellar disclosed the sarcophagus presented by Commodore Elliott to Councils for the Girard College, which is now placed in the north vestibule of the College with a tablet of its history prepared by the pupils.

The steps of the College building have been repointed with Portland Cement, closing all crevices.

Some slight but troublesome sickness, creating temporary anxiety, it was thought prudent to increase the resources of the Infirmary in order that any emergency might be promptly met by ample means of relief and cure; to that end a change was made in the service of the Medical Staff by the appointment of a Resident Physician, whose duty is to attend professionally to all the needs of the inmates of the College, and to periodically inspect and report upon the sanitary condition of every part of the establishment requiring attention. Dr. Ellwood E. Gloninger was duly elected Resident Physician, to serve for one year from January 1, 1884; and in like manner Dr. James Markoe was re-elected Visiting Physician, in which capacity he has faithfully served the College for the last eleven years.

The Infirmary has been liberally equipped, supplied with medicines and surgical appliances, and placed under the charge of a new Standing Committee who investigate its management and report thereon monthly at each Stated Meeting of the Board.

In closing that part of our report that relates to the affairs of the Girard College and the strict terms of the will which govern us, it would not be right to create the idea that we feel hampered thereby, the views of the generous testator serve rather as an incentive to surmount obstacles and fulfil his wish as a royal law to give in the broadest sense "dignity to labor"—passing over the avoidance of what might have been the condition of the poor orphans left to themselves, with no eye to pity, which is the negative merit of Mr. Girard's benefaction, we turn with pride and satisfaction to much public testimony of good work, well performed and rarely marred by pupils of the College. They now form a large body of able, influential men, "By their fruits ye shall know them," and we may here claim as an indisputable fact, that the City, whose wards they have been, has not unfrequently been indebted, as we trust it often will be, to their integrity and energy for the purity of its administration and enforcement of its laws.

MINOR TRUSTS.

The Wills Hospital continues its useful work in the treatment of diseases of the eye, receiving but trifling aid from the community in which its benefits are so extensively distributed. A new clinical room is needed which would cost

about \$10,000, but there are no means available for its construction. We desire to appeal to the bounty of those who prefer to have their benefactions directly applied to the relief of human agony and disability, to favor this charity with their aid.

The Surgeon's report for 1883, is printed in the Appendix.

The contributions are, viz. :—

Wesley Briant, a patient,	. \$10 00
A patient, 50
Phineas Fries, 10 00
Cash from a friend, 500 00

A statement of the financial condition and investments of each of the fuel funds is given in the Appendix.

The following coal orders have been issued, viz. :—

From the Elias Boudinot Fund,	. 248 tons of coal.
Jacob I. Snyder " 217 half tons of coal.
Girard " 205 " "
Paul Beck " 191 " "
City " 153 " "
Mary Shields " 111 " "
F. Augustus Sheaff " 68 " "
Thomas D. Grover " 956 " "

The Thomas D. Grover Trust is a legacy applicable to any white widow of respectable character who is a housekeeper or roomkeeper born in the United States of America, whose husband shall have died in the district formerly called the District of Southwark. A plan of more surely reaching the true beneficiaries of this trust is about to be prepared by enrolling the names of applicants who exhibit evidence of their right. This is not a charity for the poor necessarily, but may

be claimed as a lawful right by any white, native American woman, as before said, whose husband died in Southwark, whatever her worldly circumstances may be, if of respectable character.

The property of the Grover Estate gives promise of an increase of income and a consequent increase of the amount of coal to be distributed.

Charts of the Delaware river having relation to the wharfage of the city front and Grover Estate upon the river below the old Navy Yard, have been received through the thoughtful kindness of the Hon. Charles O'Neill.

From the Benjamin Franklin and John Scott Trusts, two loans each, have been made to young married artificers. In the month of November two loans were repaid in full to each and during the year the sum of \$3935.81 was received on account of loans partially repaid to these Trusts.

From the John Scott, the following payments of premiums and awards of medals for useful inventions have been made upon the recommendation of the Franklin Institute, viz. :—to

Henry Ashford, for apparatus for attaching and detaching boats.

D. K. Miller, for self-locking padlock.

B. H. Kemble, for improvement in vehicle axle boxes.

Hugo Bilgram, of Philadelphia, for improvement of gearing in metal planers.

Thomas Shaw, for improvement in friction buffers.

James Beecher, Philadelphia, for improvement in manufacture of handled cutlery.

Henry Whitall, Philadelphia, for celestial planispheres.

Robert Hitchcock, Watertown, New York, improvement in mechanical lamps.

Medals have been issued from the Hannah M. Dodd Trust to the most distinguished graduates of the Girls' High School in Philadelphia, viz. :—

One gold medal was awarded to Ella L. Kenney.

One silver medal was awarded to Anna M. Steffan.

The Rittenhouse Academy Fund arises from contributions made in 1838, in the Twenty-first ward, for a school for the benefit of the vicinity, under the name of the Rittenhouse Academy.

In the year 1875, the City of Philadelphia took possession of the lot of ground and Academy buildings thereon for public use as a part of Fairmount Park, the value of the property being duly assessed, and there being also trust funds in other hands to conduct the affairs of the school and to advance the education of the children in the vicinity, it also appeared that there were three public schools within a mile of the site so taken, all established by the City of Philadelphia, from funds raised by general taxation, none of which were full. A Master's report found that the only purpose of the Association was for the "advancement of the cause of education amongst the children of the vicinity." And this is the only trust created, with which the funds are charged, that the trust is not ended by the conversion of the land into money, nor by the fact that there are sufficient school buildings for public school purposes; a night school or a library or prizes for scholarship given, or other ways might be used for benefitting the children by the interest of the fund. On exceptions taken to the Master's report, the Court decreed that the fund should be paid to the Directors of City Trusts, which by the exertions of our solicitor, Mr. Brewster, was after much difficulty collected upon executions issued, invested in City loans, and the income is now available for the purposes of the trust. It has been suggested that lectures on popular science, the mechanic arts, &c., similar to those given under the auspices of

the Franklin Institute, might be given to the children of the vicinity, in the three schools referred to.

The principal fund is now \$3125, City 4's and 6's.

The accumulated interest is \$222.36.

The annual interest is \$153.

The Will of Henry Seybert, admitted to probate on the 14th of March, 1883, has the following clause :—

Seventh.—I give and bequeath to the City of Philadelphia the sum of ten thousand dollars, to be paid at the time and in the manner hereinafter directed, to be held by the City as a permanent and separate fund, to be called "The Seybert Fund," in trust, to invest and keep the same invested in legal securities, and to use and appropriate the income thereof for the distribution of *fuel and bread* amongst the deserving poor during the winter season."

We are informed that this charitable gift may not be available for two or three years, but as a large discretion is given to the executors, it is hoped that as a gracious tribute to the interest of the testator in the relief of the poor and needy of his native city, they may see their way clear to make this benefaction applicable at an early day to the comfort of the afflicted.

The Mary Shields legacy of one-twelfth part of her estate, "unto the city of Philadelphia, to relieve and make more comfortable the sick and insane poor, at the Almshouse in Philadelphia," has been placed in charge of a standing committee, having special charge of this particular bequest. The annual income of this fund is about \$3,500. The Committee originally in charge of this bequest, after conference with the Guardians of the Poor, have arranged that a physician shall be appointed, whose duty shall be to visit the Almshouse daily, or oftener, to confer with its officers in view of the fulfilment of the designs of its benefactress.

All bills to be approved by the Guardians of the Poor and sanctioned by the Directors of City Trusts, after being certified to by their physician, who is to make monthly reports of all action that may be taken with a detailed statement at the end of the year and estimates for the year ensuing.

The Guardians of the Poor have assented to the plan, and asked that the arrears of interest may be applied to an improved kitchen and dietary for the sick as a great beneficial employment of the fund for the comfort of the sick and insane.

Charles Oat, Superintendent of Minor Trusts since the Act of Consolidation, in 1854, died on the 19th of August, 1883, in the eighty-fourth year of his age, after an honored career of industrious attention and unswerving fidelity to the trusts committed to his charge. His daughter, Mrs. Cornelia S. Rulon, who, during his declining years, has carefully supervised the detail of their management, was unanimously elected his successor.

Gustavus S. Benson, an original member of the Board, and chairman at its first meeting for organization, died on the 22d March, 1883, in the seventy-seventh year of his age.

A meeting of the Directors of City Trusts was held on the following day, the funeral ceremonies attended by the Board, and resolutions expressive of condolence with the family, and respectful commemoration of his services, were entered upon the minutes of the Board, engrossed and transmitted to his family.

Thankful for the guidance from above, which amid encircling cares has produced all the good fruit of our work and labor, and with trusting hope that the blessing of Heaven may inspire all of us to zealously strive to perform our duties with single honesty of purpose to preserve the trusts sacred and untainted, we respectfully submit our report.

Signed by order of the Board.

A. BIDDLE,
President.

APPENDIX A.

Superintendent's Report.

APPENDIX A.

REPORT OF THE SUPERINTENDENT

OF THE

GIRARD ESTATE.

FOR THE YEAR ENDING DECEMBER 31, 1883.

OFFICERS OF THE GIRARD ESTATE.

SUPERINTENDENT, . . .	JAMES A. KIRKPATRICK.
CONSULTING SUPERINTENDENT,	CHARLES S. SMITH
SOLICITOR,	F. CARROLL BREWSTER.
CLERK,	GEO. E. KIRKPATRICK.

Real Estate in the City.

AGENT,	SAMUEL S. CAVIN.
SUPERINTENDENT OF REPAIRS,	SAMUEL K. BYE.

Real Estate in Schuylkill and Columbia Counties.

ENGINEER,	HEBER S. THOMPSON, Pottsville.
ASSISTANT SUPERINTENDENT,	EMIL C. WAGNER, Girardville.
MINE INSPECTOR, . . .	WILLIAM G. GWYHER, Girardville.
SOLICITOR,	GEORGE R. KAERCHER, Pottsville.

MESSENGER,	MAURICE COLBERT.
----------------------	------------------

Residing at Office, No. 19 South Twelfth St., with whom messages relating to repairs of buildings, or for Members of the Board, or Committees, can be left.

JAMES A. KIRKPATRICK,
Superintendent Girard Estate.

OFFICE OF THE GIRARD ESTATE, *Philadelphia, Dec. 31, 1883.*

APPENDIX B.

REPORT OF ENGINEER

OF GIRARD ESTATE,

IN SCHUYLKILL AND COLUMBIA COUNTIES.

APPENDIX B.

To the Committee on the Property of the Girard Estate without the City of Philadelphia:—

GENTLEMEN:—

MANUFACTURING industries and general trade during this year cannot be said to have been prosperous, although there have been no great business failures to cause widespread suffering. As the year has approached its close, increasing signs of weakness and business depression have appeared, such as the closing of industrial establishments, and more particularly of iron furnaces and mills. Notwithstanding this condition of general business the demand for and production of anthracite coal has exceeded that of any previous year. Thirty-one million and seven hundred and ninety three thousand and twenty-seven tons of coal have been mined and shipped to market from the Anthracite region of our State, exceeding by two million and six hundred and seventy-three thousand tons the largest production ever previously made. A million, five hundred and ninety-seven thousand, nine hundred and fifty-eight tons have come from the collieries on the Girard Estate.

With this year expire all excepting two of the first fifteen-year term coal leases on the Estate. As all the Lessees were tenants acceptable to the Trust, no encouragement was given to outside parties desiring to step in between them and a renewal of their leases. Renewals were arranged with all the former Lessees for a term of fifteen years, commencing January 1st, 1884, at satisfactory rates. The royalty was fixed by the Trust at what was

considered a fair rate, and this rate was accepted by the Lessees. In the new leases the royalty on all large coal (from chestnut to lump, inclusive,) is forty cents per ton for the first year, and for each year succeeding one cent per ton more. On all coal below chestnut in size the royalty is fifteen cents per ton, continuing the same through all the fifteen years of the lease. All improvements and machinery above the surface of the ground and below the surface, all pumps, fans and stationary engines without any connections are declared to be property in which the Lessee has an equity upon the expiration of the lease. Fires in the mines, in locomotives, furnaces, black-smith shops, or for any purpose, are to be no longer allowed. In other respects the new leases do not differ materially from the old.

A piece of ground, containing coal, below the Mammoth Vein (with a small piece of Mammoth Vein outcrop worked once already twenty years ago), on the Thomas Paschall and John Blackey Tracts, south of the Flower and Mertz interfering warrants, has been withdrawn from the East Bear Ridge Colliery lease and covered by a new lease to Mr. John A. Dutter. Messrs. Myers, McCreary & Co., requested separate leases for their two collieries.

There will therefore be hereafter twelve coal leases on the Estate in place of ten as heretofore. Before entering upon operations under the new leases Messrs. Myers, McCreary & Co., with the consent of the Trust, transferred their leases to the Philadelphia & Reading Coal & Iron Co. The map attached hereto shows the distribution of the coal land of the Estate to the different Lessees. The usual tables of annual production and gross revenue from coal mined during the year are given below, as also a detailed survey of the condition and prospects of each colliery's mining operations and of the other interests of the Estate.

DETAILED STATEMENT OF THE CONDITION OF MINING AND OTHER INTERESTS.

LEASE NO. 1.—HAMMOND AND CONNER COLLIERIES.—*Philadelphia & Reading Coal & Iron Co., Lessee.*—Hammond Colliery has steadily maintained a fair rate of production. For seven years past its average has been about one hundred thousand tons annually. During the year past it has made up its product of over one hundred and seventeen thousand tons, the largest, excepting one, ever made, from the new work in the upper member of the Mammoth Vein and in the Buck Mountain Vein, first opened below water-level by a tunnel in 1882, and from the removal of pillars in the old workings of the Mammoth Vein.

The fault encountered in the East Buck Mountain gangway at the close of last year was cut through and the coal seam recovered in good condition. A tunnel to cut the seams of coal lying above the Mammoth Vein has been given out at contract, and is now in progress.

This will open to profitable mining a large run of superior coal.

CONNER COLLIERY operations continue above water-level in the coal of the Buck Mountain Vein, superior here to that of the same seam found elsewhere in this coal field.

The lately re-opened gangway on the east side of the Raven's Run ravine, has been driven through much irregular ground, but at the present time, and for some months past, the measures have been regular and the coal good.

The lease to which these two collieries belong covers the south dip of the Shenandoah basin at its deepest point on the Estate. Its length of run is two miles, and all the seams of coal known to exist anywhere in this neighborhood are found within its limits. A more valuable field for mining operations can hardly be found in the anthracite coal region.

LEASE NO. 2.—GIRARD COLLIERY.—*Philadelphia & Reading Coal & Iron Co., Lessee.*—This colliery also has for the last seven years maintained steadily a fair yield of coal. This year it has mined eighty-one thousand tons.

Near the eastern limit of its territory the Mahanoy Creek flowed immediately over the Mammoth Vein at its intersection with the surface. Until a new channel should be cut to prevent the creek from breaking into the mine, it was necessary, as the dip of the measures is very steep, to preserve intact the coal under the creek bed from the surface all the way to the gangways.

The Mahanoy Creek was moved during the year so as to make it cross from the south to the north side of the valley on the solid coal left as a barrier pillar between West Bear Ridge and Girard Collieries, and to flow thence westward against the bluff of the hill to the north of the Mammoth Vein outcrop. The mining of this coal is now in progress. An additional steam pump was put in the slope early in the year, and six new boilers were erected on the surface. The old shaft over which the breaker stood, which extended from the water-level to the surface, no longer of use, was filled with coal, refuse and clay, to prevent fire being carried underground in case of its occurrence on the surface.

Tunnels are driving on the second level below the surface, north and south from the Mammoth to the Buck Mountain Vein, which will open for work a large field of new coal by the time the places now producing begin to be exhausted.

LEASE NO. 3.—NORTH ASHLAND COLLIERY.—*Philadelphia & Reading Coal & Iron Co., Lessee.*—The only new work done here this year has been in advancing the counter gangways, which divide the long stretch of coal on the western part of the lease

into two lifts. Work in the upper of these has been driven vigorously. In the lower level breasts have been opened and everything gotten in readiness to work as soon as the counter workings shall be finished. The yield of coal is larger this year than in any previous, excepting one. A tunnel to cut the Buck Mountain Vein on the slope level has been given out at contract, and is now under way. This with the work opened in the Mammoth Vein, will afford coal without sinking to any greater dept for a number of years.

LEASE NO. 4.—SHENANDOAH (PACKER NO 2) AND PACKER (NO. 4) COLLIERIES.—*Lehigh Valley Coal Co., Lessee.*—The new Shenandoah Colliery breaker built on the site of the breaker destroyed by fire October 12th, 1882, began preparing coal on the fourteenth day of February, 1883.

In the first full month, March, ten thousand and five hundred tons of coal passed through it. The breaker is strongly built and of the best material, conveniently arranged for work, furnished with the most approved machinery, and protected from fire by a sheet iron roof and fire-proof paint over all exposed wood-work. Since February, work in the mines has been driven vigorously in every direction. Considerable coal has been obtained from the re-opening of work in the old levels, the first and second below the surface. On the third level the gangways have been extended east and west, on the one side, to the barrier pillar established to separate these from Packer Colliery No. 4 workings, and on the other side to within two hundred and eighty yards of the western lease limit. On the fourth level the western gangway has been extended to within one hundred yards of the lease limit. A tunnel has been driven on the fourth level from the upper member of the Mammoth to the Holmes Vein, and the same tunnel is now pushing ahead to cut the Primrose Vein. Another tunnel is driving on the second level from the Mammoth to the Holmes Vein.

PACKER COLLIERY (NO. 4) workings are now conducted on four different levels, and in as many as four different seams on a single level. On the second level below the surface, the Holmes

Vein is worked east to the rise of the basin, and west to within two hundred and ten yards of the Shenandoah Colliery barrier pillar. On the west side a fold occurring in the Holmes Vein admits of two gangways on the same seam, level and dip. On the third level there are workings in the Buck Mountain, the Mammoth, the Four Feet and the Holmes Veins. The Buck Mountain Vein here arches over into the basin to the north (in which is Lehigh or Packer No. 3 Colliery), without coming out to the surface. On account of this peculiarity of formation and consequent difficulty of ventilation, no gangway has been driven west of the tunnel, and east of the tunnel but two breasts have been worked. A point has now been reached by the extension of the east gangway at which it is hoped an airway may be opened directly to the surface. The Four Feet Vein on this and the second level has been worked but slightly. It is a good seam and will yield well.

The Holmes Vein on the west side is within twenty yards of the Number Two Colliery barrier pillar. On the east side its face is not far from the synclinal axis of the basin, which rises rapidly in this direction.

The fourth and fifth level gangways in the Mammoth Vein met the same synclinal axis one thousand and forty-three, and five hundred and eight yards, respectively, east of the slope. The fifth level gangway in the Mammoth Vein, on the west side, has still thirty yards before it unopened to the No. 2 Colliery barrier pillar.

The production this year is two hundred and twenty-five thousand, four hundred and seventeen (225,417), tons.

LEASE NO. 5.—CONTINENTAL COLLIERY.—*Lehigh Valley Coal Co., Lessee.*—Improvements in progress here will enable this colliery to take rank among the large producers on the Estate. An inside slope to open a third lift on the Mammoth Vein, a tunnel on a rising grade to strike the Primrose Vein in the synclinal axis of the basin, and command both dips, and a tunnel to cut the Buck Mountain Vein, are all well under way. Abundant provision has been made against a flood of water by the erection of two new

steam pumps with a capacity of a thousand gallons a minute, beside the renovation and improvement of the old pumping apparatus. Six new boilers are about to be erected for additional steam supply. The coal product during the past year has come from the Mammoth Vein, near the eastern end of the lease, and from the western workings in the Buck Mountain Vein. The rock fault which has taken the place of the coal in the east gangway of the Buck Mountain Vein, still continues a barrier to mining operations in that direction above water-level.

It is expected that the tunnel in the slope level from the Mammoth to the Buck Mountain Vein will open the coal and prove the formation beyond this point.

LEASE NO. 6.—COLORADO COLLIERY.—*Lehigh Valley Coal Co., Lessee.*—The territory formerly covered by Lease No. 11, and that belonging to this have now been embraced in one lease.

This lease and that of Hammond and Conner Collieries cover the largest body of coal in the Estate yet untouched, lying in the deepest part of the Shenandoah basin, and extending on dips varying between thirty and sixty-five degrees, from the outcrops on either side of the basin, fifteen hundred feet above tide to the synclinal axis, nine hundred feet below tide. No work is yet opened lower than eight hundred feet above tide on either side of the basin. Plans are laid by the Lessee, not only for opening extensively to supply coal to the present colliery by tunnels to the seams lying above and below the Mammoth, but also for the erection of a new colliery (No. 5) as nearly as practicable in the centre of the enlarged Lease. A shaft is to be sunk on the north side of Bear Ridge, directly opposite Hammond Colliery, five hundred feet deep, to reach a point three hundred and fifty feet vertically below the level of the foot of the present slope, which is expected to allow two working lifts in the Mammoth Vein below the present gangways. Tunnels from the foot of the shaft south will cut and open for work the seams over-lying as well as the Mammoth Vein. A large breaker to prepare this coal is proposed to be placed on a branch of the Ashland extension of the Lehigh Valley Railroad.

Two tunnels from the Mammoth Vein near the slope foot in No. 1 Colliery were started late this year to the underlying and overlying seams. The latter has reached the Primrose Vein, and the former will cut the Buck Mountain Vein in a few yards distance. A trial hole bored into the face of the water-level tunnel discovered the Buck Mountain Vein there, and a tunnel is now in progress to open it at this point. An effort is also making to re-open the water-level gangway in the Mammoth Vein around the west point of Bear Ridge, to obtain the large body of coal known to be there unmined.

Pending the progress of some of these improvements, the shipment of coal has been wholly suspended since early in November.

LEASE NO. 7.—BEAR RIDGE COLLIERIES.—*Philadelphia & Reading Coal & Iron Co., Lessee.*—This lease and the two new leases of the same territory for fifteen years, from January 1st, 1884, already executed to Myers, McCreary & Co, were, by the consent of the Board of Directors of City Trusts, transferred to the Philadelphia & Reading Coal & Iron Co., on the twentieth day of November, 1883. Possession was taken by the present Lessee on the first day of November.

At the WEST COLLIERY the old workings on the south side of the basin with the new workings near the western end of the lease on the north side, have supplied abundant coal to keep the breaker fully occupied. The eighty-three yards remaining unworked to the western lease limit, and the two hundred yards to the eastern will be opened immediately. The Holmes Vein, cut by the tunnel across the basin, will be mined, and the Buck Mountain also opened. Tunnels to the latter north and south from the Mammoth Vein on the second level are under contract.

EAST BEAR RIDGE COLLIERY's product during this year has been largely from the fields on top of the ridge, stripped of their surface covering, where the coal is quarried out in daylight; though the counter gangways underground have yielded a considerable quantity. There still remains a larger area to be uncovered on the ridge.

Since the transfer of the lease a gangway has been started from the tunnel, in the seam overlying the Mammoth, known as the Seven Feet Vein, or the top split of the Mammoth, which is worked at Turkey Run Colliery adjoining this lease.

John A. Dutter, through his Laurel Ridge Colliery, has mined twenty-one thousand, three hundred and fourteen tons under his sub-lease. In the tables above, this is included in the shipment from East Bear Ridge Colliery.

In the new leases this coal is still covered by the East Bear Ridge Colliery lease. The new lease given to Mr. Dutter, as before stated, is of the coal on the south side of the basin.

The mining operations of Gilberton Colliery, of the Philadelphia & Reading Coal & Iron Co., were extended over the line of the Estate in January, and coal was mined from the Girard Estate by them during a large part of the year. The whole quantity mined amounted to twelve thousand and ten tons and four hundred weight, which in the tables of tonnage and revenue is placed to the credit of East Bear Ridge Colliery, to which this coal belongs.

LEASE NO. 8.—WILLIAM PENN COLLIERY.—*William Penn Coal Co., Lessee.*—The workings of this colliery are of unusual extent, being carried on at five different levels and in four different seams at the same time.

Beside the seams working there are two seams, the Seven Feet and the Four Feet over the Mammoth, opened and ready for mining at any time. The work is distributed as follows:—

Above water-level, in the Buck Mountain, the Mammoth, the Holmes and the Primrose Veins.

On the shaft level, in the Buck Mountain, the Mammoth, the Holmes and the Primrose Veins.

On the No. 1 slope level, (first level below the shaft,) in the Mammoth and Holmes Veins.

On the No. 2 slope level, (second level below the shaft,) in the Mammoth Vein only.

The workings on these levels and in these seams extend east and west from the neighborhood of the shaft to points a mile or more

distant, and send their product to the shaft in a steady stream at the rate of a thousand tons a day. Beside the usual and regular extension of gangway during the year, tunnels have been driven on the shaft level from the Mammoth to the Buck Mountain Vein, and from the Holmes to the Primrose Vein, and on the No. 1 slope level from the Mammoth to the Holmes Vein.

The Directors of City Trusts who visited the coal lands of the Estate in October, inspected the operation of the rock-drills driven by compressed air in the tunnel to the Buck Mountain Vein, then under way.

Drifts were opened during the year from the ravine near the shaft, into the Mammoth and Holmes Veins, which will recover coal left in chain pillars of the former when first worked, and will open for more economical handling the coal of the latter, now dumped into the chutes, re-loaded and hoisted in the shaft. The production this year is two hundred and twenty-eight thousand and ninety-nine tons, the largest from any one colliery on the Estate, and the largest yet made by this colliery.

LEASE NO. 9.—KEHLEY'S RUN COLLIERY.—*Thomas Coal Co , Lessee.*—The mining in the Mammoth Vein has now opened the coal on the east side as near as deemed safe to the old workings of the Knickerbocker Colliery. Toward the west the gangways of the Mammoth Vein, abandoned for two years during the continuance, and subsequent to the fire in the mine, and broken and closed by the settling of the strata consequent upon the robbing of the pillars in Kohinoor Colliery, were re-opened and securely timbered.

The Mammoth and Buck Mountain gangways above water-level were advanced in excellent coal. The Buck Mountain gangways on the slope level were advanced east and west, and the Seven Feet Vein opened westward. Two short tunnels were driven on the east side from the Mammoth to the Skidmore and Seven Feet Veins. The coal obtained has not only supplied the breaker to its utmost capacity, but has insured a supply for some years without additional expense. The production is one hundred and fifteen thousand three hundred and eleven tons, There has been no

thought yet of removing the water in the lower levels, nor is it probable there will be for some years, unless a new breaker should be built, or that now in use much enlarged.

LEASE NO. 10.—LEHIGH COLLIERY.—*Lehigh Valley Coal Co., Lessee.*—The large amount of work done here during several years past, in opening gangways and air-ways, has left comparatively little of this kind of work to be done this year. Some gangway was driven in the lower levels and in counters, and an inclined plane was erected, but the work has been mainly mining in breasts and panels. The plane built, is for the purpose of carrying the coal of the third level and of the two old levels above to the fourth level, whence it will go to the surface.

The old workings of the first and second levels have been reopened, and have produced a large quantity of coal, principally from the Seven Feet Vein, overlying the Mammoth. Two large steam pumps have been placed in the second and seventh levels, the latter of which hoists the water from the lowest workings to the second level, and the former throws it to the surface. The shipment for the year is one hundred and fifty-five thousand and five hundred and two tons. This rate should be maintained for the next and several succeeding years.

LEASE NO. 11.—OF THE COAL WEST OF AND ADJOINING COLORADO COLLIERY LEASE.—*Lehigh Valley Coal Co., Lessee*,—has been consolidated with that of Colorado, (Packer No. 1) Colliery. The extensive improvements proposed under the new lease have been briefly referred to above.

THE LEASE OF SURFACE NORTH OF GIRARDVILLE BOROUGH FOR REFUSE COAL DEPOSIT AND THE CLEANING OF SMALL COAL AT GIRARD JIG HOUSE, have brought a revenue of seven hundred and forty-one dollars and fifty-two cents,

TIMBER SOLD has returned one thousand, one hundred and sixty-nine dollars and ten cents.

SMALL LOT LEASES AND SALES OF STONE AND SAND have paid four thousand, two hundred and forty-five dollars and seventy cents.

BUILDING LOTS SOLD IN GIRARDVILLE have yielded four thousand, one hundred and seventy dollars and twenty cents.

COLLIERY WATER SUPPLY.—The year past has been one in which the rain fall was abundant and well distributed through those months in which seasons of drouth usually occur. During five months only, January and the Summer and Autumn months, was there any occasion to draw upon the water stored in the large reservoir. At the close of last year the reservoir was well nigh empty, containing but nine feet in depth of water. On the seventeenth of January it had fallen to five and a half feet. From that date the height of water rose until on the twelfth day of February, it overflowed and continued to overflow until the fifth day of August. From August fifth until November sixteenth the collieries and tenants on the Estate and inhabitants of Girardville were supplied from the water stored in the large reservoir. On the sixteenth of November the reservoir was filled again, and continues full at the present time.

The largest consumption in one month during the year, October, was ten million one hundred and forty-two thousand two hundred and eighty-two (10,142,282) gallons.

The smallest consumption during one month, April, was four million one hundred and eleven thousand two hundred and ninety-seven (4,111,297) gallons. The average monthly consumption was seven million one hundred and seventeen thousand four hundred and twelve (7,117,412) gallons. The total consumption for the year 1883 was eighty-three million six hundred and fifty-six thousand nine hundred and forty-two (83,656,942) gallons.

Lost Creek Stream rises on the James McNeal tract on the Girard Estate, and flowing westward it passes over a small part of the Thomas P. Cope tract and over the Israel Cope, James Howel, Edward Lynch and into the Shenandoah Creek on the John Brady

tract; in all its course flowing only upon lands of the city of Philadelphia.

From 1863 until 1879, the water was used by the operators of Shenandoah Colliery under successive leases from the city of Philadelphia. As the greater part of the water in Lost Creek had always been and was still running to waste, your Board determined in 1879 to build a dam and lay lines of water pipe to such of the collieries on the Girard Estate as were suffering for the want of water for generating steam. A small dam was built on the Edward Lynch tract and a line of pipes laid to William Penn Colliery in that year. In 1880 and 1881 a large dam was built on the James Howel tract with a capacity of thirty-five million gallons, and a main pipe laid down the Shenandoah Valley to Girardville Borough, with branches to Packer Colliery, Shenandoah Colliery, Colorado Colliery, Hammond Colliery, and Girard Colliery, and these collieries and the inhabitants of the Borough of Girardville were supplied with water at little more than a nominal price.

During the present year a fresh attempt was made to assert a claim under the Myer title to the Thomas P. Cope tract. A house was erected on it, and an effort made to seize Lost Creek Stream flowing a short distance over it. The notice of intention to apply to the Governor of the Commonwealth for a charter for a water company, (under which the stream and water works already erected by the City might be seized,) required by law, was fortunately observed immediately upon its publication, and a notice was published the day following of intention to apply for a charter for the Girard Water Company in the interest of the Girard Trust. Upon the expiration of the time of publication required by law, the Governor of the Commonwealth after a full hearing of the case before himself and the Attorney-General, at which the Trust was represented by Solicitor Kaercher, and the adverse petitioners by two Attorneys of the Court of Schuylkill County, granted a charter to the Girard Water Company and refused that asked by its adversaries.

The Girard Water Company, incorporated August 29th, 1883, will take possession of the Lost Creek Stream and Water Works, and commence business on the first day of January, 1884.

Its Directors are Louis Wagner, Alexander Biddle, James Campbell, William H. Drayton and William B. Mann.

Its President is Louis Wagner; Secretary, Geo. E. Kirkpatrick; Treasurer, J. A. Kirkpatrick; Superintendent, E. C. Wagner; Solicitor, S. H. Kaetner; General Manager, Heber S. Thompson. Its office is 1138 Girard Street, Philadelphia.

The rate of taxation for the support of schools, roads, the poor, and the county administration in the different townships, is given in the following table:—

Township or Borough.	Road or Borough.	Special Road.	School.	County.	Poor.	1881 Total.	1882 Total.
Corryingham .	5½ mills.	1½ mills	15½ mills	5 mills	15 mills	55 mills	51½ mills
Butler	7 " "	3 " "	16 " "	6 " "	16 " "	52 " "	48½ " "
W. Mahanoy .	4 " "	1½ " "	13 " "	6 " "	16 " "	51 " "	47½ " "
Mahanoy . . .	5½ " "	1½ " "	13 " "	6 " "	16 " "	51½ " "	48 " "
Union	6 " "	1½ " "	4 " "	6 " "	16 " "	38 " "	34½ " "
E. Union . . .	5 " "	2 mills	5 " "	6 " "	16 " "	38 " "	35 " "
Girardville . .	10 " "	1½ " "	14 " "	6 " "	16 " "	52 " "	48 " "
Gilberton . . .	5 " "	1½ " "	12 " "	6 " "	16 " "	51 " "	47 " "
Shenandoah . .	10 " "	1½ " "	15 " "	6 " "	16 " "	52 " "	48 " "

The cost of road making and repair in Butler and West Mahanoy townships was met by a voluntary assessment upon themselves in proportion to their valuation by the taxpayers of these townships without a tax-levy, as for several years past.

The business of the Estate has been faithfully attended to by all the officers joined with me in its care.

Very respectfully yours,

HEBER S. THOMPSON,

Engineer of the Girard Estate.

POTTSVILLE, PA., December 31, 1883.

To the Directors of the Girard Water Company.

GENTLEMEN:—

THE increasing quantities consumed by those heretofore using water from Lost Creek water works and by the constantly growing number of consumers, and the additional quantity which a new colliery about to be erected by the Lehigh Valley Coal Co., will require, make it necessary that provision should be made for a larger supply than that now possible to be stored for use in seasons of drouth. For six months in every twelve water runs to waste in quantity sufficient to fill a reservoir many times larger than the one now built.

At certain other times during the dry season, the draught upon the supply stored is greater than can be furnished for any length of time. If the quantity furnished is curtailed to one-half or one-third a full supply, great inconvenience is sure to be occasioned, both to the collieries and to domestic consumers, and if the supply is exhausted large damage and loss will be occasioned. The building of another and larger dam on Lost Creek seems imperative to insure a full supply of water at all times. Immediately above the large dam now built another can be built with a capacity of eighty-five million gallons. The greatest height of embankment required will be thirty-eight feet, and the whole content of the embankment will be forty thousand cubic yards. The surface area to be covered by water inside the embankment foot will be seventeen and seven-tenths acres. This surface should be thoroughly cleaned of muck, foul soil and decayed vegetable matter while the dam is building. It may be that even this additional reservoir will not store sufficient water for the wants of the mining operations and people in the Shenandoah Valley a score of years hence. In that event, as the water of the Catawissa Creek itself is unfit for use, being largely mixed with refuse mine water, one or more of the small streams flowing into it will have to be dammed

and the water raised to the summit of the mountain by pumps. The long distance from which this water will have to be brought, the cost of heavy pumps, boilers and column pipe necessary to raise the water to so great a height, (six hundred and fifty feet vertically), and the constant expense of wear and tear of machinery, fuel, firemen, engineers and other supervision, make it desirable to avoid seeking a supply in this way as long as possible. The dam referred to on Lost Creek can be built at a comparatively small expense, will cost nothing for maintenance when built, and will in all probability be needed before it can be completed. If put under contract so as to be started in April it may, under favorable circumstances, be completed by November in the same year, but water cannot be obtained to fill it before Spring of the following year. If not completed in the same year it cannot be filled with water before the second year after work on it shall have been begun.

Very respectfully yours,

HEBER S. THOMPSON,

General Manager Girard Water Co.

POTTSVILLE, PA., *December 31, 1883.*

THIRD CLASS OF HONOR.

ABEL, GEORGE F.
BAKER, FRANK A.
BROUGH, ALBERT L.
DAUB, WM. S.
DOWNING, ROBERT
GRAHAM, GEO.
GRANSBACH, HOWARD
HAGEN, HOWARD
HALLMAN, HENRY L.
HARKNESS, JOHN

HIGARTY, WM.
HELLERMAN, WM. R.
HEYS, THOMAS B.
LAVER, LOUIS
LAYER, CHARLES W.
LEMON, ALBERT J.
LINDSAY, JNO. A.
MCMULLIN, ROBERT
MUNSCH, ALOYSIUS J.
NORTON, JOHN E.

PARKINSON, MARTIN H.
RECKNAGEL, WM. E.
ROTHERMEL, WM. S.
SCHULER, PHILIP
SOFF, ERNEST
STAPP, FRED'K C.
TOMPKINS, WM. J.
TRUITT, GEORGE W.
WELLS, WM. N.

SECOND CLASS OF HONOR.

CHANDLER, JOS. C.
DODGE, LEONARD
DOUGHERTY, WM. J.
DUNEGAN, JAMES D.
ELLENBERGER, WM. M.
FINK, DANIEL
FORREY, WM.
FRICKER, ALBERT
GREINER, WM.
HILKMAN, WM. C.

HARNER, FRANK
KELLEY, THOS. H.
KNEER, HARRY S.
KOPP, WM.
KRAMER, HARRY
LANNAN, ROBERT J.
MANTER, RICHARD F.
MERGENTHAUER, JNO. H.
NEELY, FRED'K B.

NEVE, EDWARD
PEOPLES, JOHN J.
RODENBOUGH, ELMER E.
SINGER, GEO. H.
SMITH, LOUIS T.
TAGGART, JOHN
WADE, LEWIS L.
WEHMEYER, HERMAN I.
WILSON, JOHN B.

FIRST CLASS OF HONOR.

CLINIC HOURS.—From 2 to 3 P. M. daily, (Sundays excepted,) at which time the Surgeons are in attendance for the examination and treatment of the patients presenting themselves.

The Clinics are open to all regular Practitioners and Students of Medicine who desire to study the diseases of the eye.

WILLS HOSPITAL

SURGEONS' REPORT FOR 1883.

THE Surgeons of the Wills Hospital respectfully present to the Board of Directors of City Trusts the following Report of this Institution for the year ending December 31, 1883.

6,438 new patients have applied for aid, an increase of 233 over the preceding year. Out of this number 168 were considered improper cases, 564 were admitted to the Hospital. Among the major operations performed may be mentioned 172 cataract operations, 45 indictomy operations.

It is quite safe to say, that while numerous charitable services have been created during the past few years for the relief of this class of disease, nevertheless, the Wills Hospital, in the number of patients treated and amount of work performed, will compare favorably with the aggregate work accomplished by all other similar services in Philadelphia.

The want of increased ward accommodations is more and more felt. It is a frequent occurrence to be compelled to refuse admission to patients coming often from distant localities, by reason of want of ward room. The dispensary service is always increasing, but unfortunately the ward accommodation has been lessened.

The surgical staff would again call attention to the great need of accommodations in which cases of a highly contagious character could be cared for. At present patients are refused admission

because no suitable ward exists for their treatment. Diseases of this character usually quickly destroy the eye, unless prompt relief is afforded, so that some provision ought to be made for their treatment. A special diet kitchen is also much needed for severe cases, children, &c.

In reviewing the cases treated during the year, it is particularly noticeable how large a number of patients come from the country districts, and as a rule these represent serious cases, such as wounds to the eye ball, occasioned by the nature of the work engaged in, such as mining, iron and steel manufacturing, and other like occupations. It would seem most proper for the State, and the various corporations whose employees receive the benefits of this charity, to furnish their fair share of pecuniary support to an institution that has so liberally and for so many years taken care of their people free of all charge, and particularly as the Hospital has arrived at a condition when these services will otherwise have to be curtailed more and more, by reason of lack of funds.

GEORGE STRAWBRIDGE,
W. W. McCLURE,
H. L. SCHELL,

Committee.

ANNUAL REPORT OF RESIDENT SURGEON FOR 1883.

Philadelphia, January 1, 1884.

Resident Physician's Report to the Visiting Managers, for the Year 1883.

Number of patients in the House at last Annual Report:—Males, 18; Females, 14;	Total, 32
Number admitted during 1883:—Males, 387; Females, 177;	" 564
Number discharged during 1883:—Males, 375; Females, 181;	" 556
Of these were:—	
Cured, 204; Improved, 306; Not improved, 21;	" 556
Number of patients now in the Hospital—	
Males, 30; Females, 10;	" 40
Number of new patients applying at the Dispensary during 1883.	6,438
Whole number of new patients treated in 1883, less 168 who were able to pay a physician,	6,270
NATIVITY.—United States, 4,374; Germany, 507; Scotland, 69; France, 18; Sweden, 11; Canada, 10; Russia, 8; Prussia, 6; Denmark, 5; Poland, 4; Nova Scotia, 3; West Indies, 3; Austria, 2; Greece, 2; Australia, 2; South America, 1; Africa, 1; Malta, 1; India, 1; New Foundland, 1; Mexico, 1; Norway, 2; Hungary, 1; At Sea, 1; Ireland, 1,068; England, 287; Wales, 25; Switzerland, 9; Cuba, 4; Italy, 11. Total, 6,270.	

Of the 6,270 patients treated, 571 were cases of foreign bodies in the eyes, and treated by the resident surgeon.

Very respectfully submitted by

CHAS. W. KOLLOCK, M. D.,
Resident Physician.
